Administration Charges

An administration fee of \$45.00 (excl. GST) is charged per analytical report produced (ie. per ALS work order). Additional administrative charges may apply for subsequent report generation.

ALS Sample Containers - Ordering

One (1) business days' notice (two (2) business days' notice for sets) from order receipt to dispatch for sample container orders are required to give ALS sufficient time to properly pack your order. For regional deliveries, please allow an additional 3 - 5 business days for delivery.

Cost recovery charges (\$50 minimum or \$80/hour + GST and/or freight charges) may apply for urgent orders and / or deliveries when insufficient notice is received, where orders are packed but not required anymore, or not picked up within two (2) business days of the requested date.

Sample containers that are not returned for analysis may be charged at \$2.00 per sample container.

Sample containers returned to ALS unused may be charged at \$2.00 per sample container as these cannot be reused and must be sent to recycling / landfill.

International orders will attract a \$200 + GST Dangerous Goods (DG) certified packing fee + freight charges and will be sent with ALS' preferred provider unless instructed otherwise.

ALS Customer Service

- This quotation has been developed based upon the information provided, please ensure that we have interpreted your project scope correctly.
- The prices provided in this proposal apply for primary laboratory sample testing only (as opposed to secondary/QC testing).
- ALS provides Laboratory Control Samples (LCS), Method Blanks (MB), Matrix Spikes (MS), Laboratory Duplicates (Dups) and Surrogates (where applicable), at frequencies at or above the NEPM guidelines - revised 2013. Should you require further details please contact ALS customer services.
- ALS is NATA accredited for all tests listed in this proposal unless advised otherwise.
- For further information on short holding times please see: [ALS Environmental - Pocket Guide](#)
- ALS QA/QC is reliant upon appropriate replicate samples bottles/volumes especially for waters, air filters and sorbents. High contamination may negate ALS reporting of matrix spike recovery data.
- Please advise via COC where additional sample has been provided for QA/QC purposes e.g. by noting "Lab QC" (for both Dup and MS) or "Lab Dup" or "Lab MS".
- QA/QC, holding times, QC frequency and preservation compliance are summarised in ALS DQO reports to assist in quality review.
- Electronics results including COA, QC and DQO reports plus tailored EDDs formats such as ESDAT, EQUIS and many others. [EDDs - EQUIS and ESDAT info & support](#)

General Notes, Communication, Reporting and Charges

1. Unless agreed otherwise, where fast TAT is requested on samples and agreed to by ALS, surcharges will apply on top of standard rates quoted with results reported by 6pm on the due date.
2. Batches received at the laboratory after 5pm are deemed received the following day for the assigning of reporting deadlines unless agreed otherwise in advance. Standard results will be reported by 6pm on the date due unless advised otherwise. Signing of COCs acknowledges receipt of the batch, not checking of all samples. The SRN will confirm accurate receipt.
3. The limits of reporting (LOR's) quoted are for samples with minimal matrix interference, no dilutions a moisture of <50%.
4. Samples should be submitted with at least half the extraction/analytical holding time remaining to minimize breaches. ALS will endeavour to meet these, however accepts no responsibility for missed holding times in any such cases.
5. Suite prices apply to full suites with defined LORs. Normal rates apply if partial suites are requested.
6. Where costs are to be charged to a third party, this third party must have a valid account and have provided written authorisation for samples to be submitted to ALS through other (clearly defined) parties. Any COCs must clearly state the third party to be invoiced and provide relevant order/reference details to avoid potential re-invoicing fees of \$50 per invoice.
7. For metals in waters, field filtration is important and status must be indicated on bottles (via tick) indicating total or dissolved testing. In the absence of a 'tick' or COC advice, total metals will default with appropriate LORs and charges.
8. Soils plus filter papers not consumed during analysis are retained for two months \pm one week and waters for three weeks from receipt. Samples are disposed of at this time unless requested otherwise except potentially some hazardous waste.
9. ALS will adopt the standard eight (W2 or S-2) metals (As, Cd, Cr, Cu, Ni, Pb, Zn, Hg), in the event that the terminology "metals" is listed on the COC with no elements specified.
10. Moisture is determined 'gratis' on solids to enable dry weight basis reporting where samples are submitted for additional analysis (e.g. metals, PAH). Moisture is charged at \$5.00 per sample in other cases.
11. The client must consider the measurement uncertainty and the decision rule to meet a certain regulatory compliance to form their decision. A copy of the decision rule is available on the ALS website via [Enviromail 53 - Measurement Uncertainty](#).
